**Project and Program Management**

Graduates of our MS in Project and Program Management program should feel equipped to lead planning, estimating and budgeting, negotiation, and conflict management, and engage in effective communication.

Program outcomes:

- Manage the project lifecycle in all its phases in a way that assures the delivery of the negotiated scope and quality level, while meeting time and budget constraints.
- Effectively communicate the project/program status, issues, expectations and risks, both verbally and in writing, to project and program stakeholders and team members.
- Demonstrate how projects contribute to an organization’s ability to realize its strategic goals and business benefits.
- Exercise management and leadership skills in the conduct of programs and projects of various size, scope and complexity that may be international in nature.
- Effectively manage the roles, communications and expectations of project stakeholders throughout the lifecycle of the project.

The program curriculum in consistent with PMI’s Project Management Body of Knowledge (PMBOK®). It integrates understandings of business functions and challenges at various levels of corporate operation, and involves the interdisciplinary study of management, leadership and technology.
