Introduction to Photoshop
For Photography

COURSE DESCRIPTION
In this workshop participants will develop their skills with making photographic images and editing them using Adobe Photoshop. We will spend time going on photographic expeditions in local environments to refine our approaches to picture-making. Then, we will bring those images back to the classroom and spend time editing them in Photoshop.

We will develop best practices for controlling contrast and color using adjustment layer masks. If time permits, we will also explore some advanced image manipulation techniques in the program. All participants will exit the course with a more refined understanding of “making” photographic images in both the camera and in Photoshop.

INSTRUCTOR
Scott Patrick Wiener holds a BFA from Massachusetts College of Art and Design (BFA, 2001), and an MFA from the Art Institute of Chicago. His recent exhibitions include “Landscape Acquisition” at the ICA Boston, “Brink v1” at the Boston Center for the Arts, and “Distant Images, Local Positions” at the Elizabeth Foundation for the Arts.
