TUESDAY
NOVEMBER 14

Physics Colloquium
4:00 PM
Location: Abelson 131

Hidden Figures Showing
and Q&A
7:00 PM
Location: Schwartz Hall, Auditorium

Ms. Williams-Byrd is currently an electro-optics engineer for the Space Mission Analysis Branch of the NASA Langley Research Center and leads a technology and integration team that identifies and communicates technologies that could enable human spaceflight exploration to a variety of space destinations.

She has identified, performed analysis, assessed, prioritized and communicated current and future technologies that would enable human spaceflight exploration to decision-makers at NASA Headquarters. Ms. Williams-Byrd began her career at NASA Langley Research Center designing and developing solid-state laser systems used for remote sensing of the Earth’s atmosphere.
