Project and Program Management provides real value to the increasingly project-oriented business world. In the private, not-for-profit and public sectors, the abilities to plan projects, manage budgets, communicate objectives and negotiate with stakeholders give you a competitive edge. Whether you work within an organization, own and operate your own small business, or provide consultant services, project and program management skills will help you advance your career.

The Master of Science in Project and Program Management provides graduates with an integrated, interdisciplinary understanding of the skills required to manage projects and programs at various levels of corporate operations. We designed the program curriculum to be consistent with but not bound by the Project Management Body of Knowledge (PMBOK)® and to add tremendous value to your professional skill set. Invest in yourself and your career by working with our experienced faculty, who draw on extensive professional experience, to improve your ability to collaborate with stakeholders to attain shared goals. Broaden your experience, develop powerful professional skills, and widen your job prospects with this popular M.S. degree.

GRADUATES ARE PREPARED TO:
- Initiate, plan, execute, control, evaluate and close out projects in a way that assures the delivery of the negotiated scope and quality level, while meeting time and budget constraints.
- Effectively communicate the project/program status, issues, expectations and risks, both verbally and in writing, to project and program stakeholders.
- Demonstrate how projects contribute to an organization's ability to realize its strategic goals and business benefits.
- Exercise management and leadership skills in the conduct of programs and projects of various size, scope, and complexity that may be international in nature.
LEANNE BATEMAN, MA, PMP, CSM, CIP, MCTS, is the Academic Program Chair for PPM Program. She is the principal consultant with Beacon Strategy Group, a Boston-based management firm.
