IMPORTANT — Changes to requirements for Master of Science in Project and Program Management, effective fall 2016

After a recent industry review, Graduate Professional Studies is introducing changes to the program requirements for the Master of Science in Project and Program Management degree. What you need to know:

- Students already admitted into the MS in Project and Program Management degree prior to April 26, 2016 must follow the program requirements under which they were admitted. These requirements are outlined below.

- Students who applied to the program after April 26, 2016 will follow the new program requirements posted on the MS in Project and Program Management for current students.

Please contact your student advisor with any questions or concerns.
