IMPORTANT — Changes to requirements for Master of Science in User-Centered Design, effective Fall 2019 Session 1.

After a recent industry review, Graduate Professional Studies is introducing changes to the program requirements for the Master of Science in User-Centered Design degree. What you need to know:

- Students already admitted into the Master of Science in User-Centered Design degree prior to March 13, 2019 must follow the program requirements under which they were admitted. These requirements are outlined below.

- Students who applied to the program after March 13, 2019 will follow the new program requirements posted on the Master of Science in User-Centered Design page for current students.

Please contact your student advisor with any questions or concerns.

Program Requirements for User-Centered Design students admitted prior to March 13, 2019.
