GLOBAL STUDIES graduate study at Brandeis provides a broad perspective of global institutions, critical issues, and the complex ways that globalization affects specific regions and countries. Students are prepared to be global thinkers in business, education, government, and the non-profit sector. Global Studies students can pursue international careers in the U.S. or abroad by building upon skills such as functional expertise, language ability, or experience overseas. Careers are varied and may include working for the federal government (such as Peace Corps or Foreign Service), international service agencies (such as CARE, UNICEF, Direct Relief International), English-language teaching positions, multinational corporations, or employment in non-profit organizations. Globalization has changed almost every field and needs graduates who understand intra- and inter-national issues.

Select areas of employment

- civil and human rights
- communications and media
- culture and globalization
- diplomacy
- economic development
- English-language teaching
- foreign service
- global environment
- global health
