**1st Section: Why this employer? Who are you? Why are you writing?**

As a sports enthusiast and an athlete, I was always aware of the Celtics Basketball organization on and off the court. Now that I am pursuing a career in the business of sports, I have focused on and admire the brand awareness the Celtics administration created for the team. Because I enjoy researching and developing strategies, I know through an internship with Corporate Partnerships Activation Department, I could contribute to the goals of strengthening the brand and relationships of one of my favorite teams.

**2nd Section: Explain how you are qualified for the job**

Through my previous experiences, I have developed skills that enable me to hit the ground running. As an audit intern at KPMG, I was challenged to listen carefully, think critically about details and processes, and work independently on assignments that reflected the firm’s quality standards. I was initially assigned to review and document business processes for clients, to think critically about controls, and suggest ways to mitigate risks. My progress and willingness to learn in KPMG’s fast-paced environment convinced my managers to assign me to a small team composed of more senior colleagues performing a group audit for a client. Aware of the tight deadlines, I worked to deliver results accurately and on time. I will bring the same work ethic and willingness to learn to this internship, and I am confident in my ability to perform at a high level in a fast paced environment.
