Welcome to INT 92g 1-credit Internship Course (LATTE-based)

This course is utilized to allow students to earn academic credit for their summer internship. As the course is only 1 credit, the academic work will be limited.

All International Students completing this course MUST have CPT authorization completed before they start the internship.

Summary of Academic Requirements:

1) “Introduce Yourself”
   Introduction in "Introduce Yourself" Forum (due by June 24)

2) "Online Analytic Journal"
   Essentially, you will be creating an analytic journal, but doing it in sections online and then sending me the result of those pieces put together at the end of summer. Other students in your group will be able to see your writing.
   Students are to maintain a "weekly" Analytical Journal by responding, in detail, to the appropriate numbered Discussion Topics/Prompts in LATTE. At the end of the course, each student compiles his/her responses into one paper (journal) and uploads it to LATTE. The paper will then be reviewed by the faculty member and graded Credit or No Credit.

3) “Student Responses”
   Students are also to promote discussion by responding to a post at least once a week (total of 6 responses).

In order for students to earn 1 credit, students must successfully complete ALL of the following requirements:

INTERNSHIP:

- Internship lasting at least 100 hours over 5 weeks
- Student completed post-internship evaluation
- Supervisor completed post-internship evaluation

LATTE Course:

- Introduction in "Introduce Yourself" Forum (due by June 24)
- 1 online response to each of the 6 Discussion Topics. These responses or postings (min 250 words each) should read like a journal, with questions/prompts being addressed in paragraph form (due each week)
- Each student MUST post 1 response each week to any other posting of their choosing.
- Final Assignment/Journal Submission: Compilation of all discussion topics & responses into one final paper, in a journal format, submitted via latte by 4pm August 11th, 2011. No late submissions will be accepted.

There is a sample of a discussion response in Questions #1 and 2. I've also included a sample of a final paper/journal for you to see how to combine your discussion question responses. THESE ARE SAMPLES OF LEGITIMATE ACADEMIC WORK--DO NOT PLAGIARIZE.
