App Design Boot Camp is a technology-based residential program. Approximately 40-60 high school students from across the world will come to Brandeis for the 12-day program.

Participants will work with Brandeis faculty and staff to gain the skills necessary to create their own mobile and web applications using a variety of software platforms. The program combines app design coursework with field trips and social activities to create an exciting and transformative summer experience.

The Lead Coordinator will be responsible for:

- Helping the classroom staff facilitate the participants' experience
- Chaperoning and participating in trips around Boston
- Overseeing all non-class activities on and off campus
- Developing and facilitating non-class programming including discussion sessions, games and other social activities.
- Overseeing all aspects of residential life, including working with the Program Director and the Residential Staff to monitor and ensure participant health and wellbeing.
- Living in the dorms with the participants (in a private room), and helping maintain a staff presence in the dorms, dining hall and around campus

The ideal Lead Coordinator will meet most, if not all, of these criteria:

- Have a bachelor’s degree;
- Have experience as staff at a camp or other residential environment;
- Have strong leadership experience in an educational setting;
- Have a passion for technology and technology culture;
- Be comfortable in a diverse environment;
- Be experienced and comfortable working with teens, even in challenging situations;
- Be ready to work hard, have fun and learn a lot!

Lead Coordinator will also participate in staff orientation and debrief. Compensation includes pay, as well as full room and board for the duration.

To inquire about this position, please fill out our employment inquiry form on the Brandeis Precollege Programs website.
