App Design Boot Camp 2017 Residential Staff
Sunday, July 9 – Thursday, July 20, 2017

App Design Boot Camp is a technology-based residential program. Approximately 40-60 high school students from across the world will come to Brandeis for the 12-day program.

Participants will work with Brandeis faculty and staff to gain the skills necessary to create their own mobile and web applications using a variety of software platforms. The program combines app design coursework with field trips and social activities to create an exciting and transformative summer experience.

Residential Staff will be responsible for:
- Helping the classroom staff facilitate the participants’ experience
- Chaperoning and participating in trips around Boston
- Participating in or being present for all non-class activities on campus
- Living in the dorms with the participants (in a private room), and helping maintain a staff presence in the dorms, dining hall and around campus

The ideal Residential Staff member will meet most, if not all, of these criteria:
- Have completed at least sophomore year of college;
- Have experience as staff at a camp or other residential environment;
- Have a passion for technology and technology culture;
- Be comfortable in a diverse environment;
- Be experienced and comfortable working with teens, even in challenging situations;
- Be ready to work hard, have fun and learn a lot!

Residential Staff will also participate in staff orientation and brief. Compensation includes pay, as well as full room and board for the duration.

To inquire about this position, please fill out our employment inquiry form on the Brandeis Precollege Programs website.
