

Are you

Interested in accelerating regional action on clean energy?

Looking to gain valuable experience for success in the clean energy economy?

Passionate about producing real impact?

The Bay Area Climate Collaborative is seeking Stanford students eager to support regional work towards aggressive emissions reductions targets. This is a unique opportunity to gain perspective into the cutting edge clean energy economy in the Bay Area, and through this position, you'll have a chance to meet a wide range of political, NGO, and business leaders while learning valuable skills.

The Bay Area Climate Collaborative

The Bay Area Climate Collaborative (BACC) is a public-private partnership of the Silicon Valley Leadership Group accelerating the clean energy economy in the Bay Area region. BACC initiatives include the \$5 million EV Fleet National Demonstration Project to deploy electric vehicles to Bay Area cities' fleets and the Next Generation Streetlight initiative aimed at upgrading 200,000 streetlights to LEDs.

The Opportunity

Whether your background is in business, sociology, economics or environmental science, you are bound to find a valuable piece of our work of interest to you in areas ranging from electric vehicles to energy efficiency to renewable energy.

You will own one or more key projects involving research and execution of clean energy implementation. While projects are subject to change based upon project timelines and applicants' interests, likely summer projects may include:

- Analysis and strategy development for LED lighting implementation and other commercial efficiency
- Supporting innovative strategies to accelerate electric vehicle adoption including aggregate purchase and local government guidelines

Your Impact

Playing a key role in the kickoff of the BACC's *Bridge to the Clean Economy* initiative, you'll be able to contribute to regional progress towards clean energy targets, and have a role in large-scale regional collaborations. Working with the BACC's core staff, will allow you learn from and add to a dynamic team.
