Objectives

The Journalism Program examines the place of the media in the American—and more broadly speaking, the global—experience. The program offers students a liberal arts approach to the study of journalism. A diverse faculty of scholars and journalism professionals teach students about the role of the media in domestic and international affairs and train students in the skills necessary for the accomplished practice of journalism. In class and in professional environments, students wrestle with the challenges and responsibilities of communicating the essence of world events, and domestic and human issues in print and broadcast journalism.

The program is part of the university’s larger effort to train students to be critical thinkers and forceful writers. While there are a few courses that teach specific journalistic skills, the journalism program is not a nuts-and-bolts communications program; rather, it features a strong liberal arts curriculum that grounds students in an academic subject area and gives them the tools to translate and transmit knowledge to a general audience.

How to Become a Minor

This minor is open to all Brandeis undergraduates, subject to limitations on appropriate class size. Students who complete the requirements of the program receive journalism certificates and notations on their transcripts.

Language and Linguistics

Objectives

The major and minor in language and linguistics are designed to offer students multiple perspectives on the study of language: as a universal cognitive faculty, as an interactive mechanism for human development and for constructing social identities, as a spoken and written medium for cultural expression, and as an object and means of philosophical reflection. All these perspectives require training in the formal properties of language, including phonology, morphology, semantics, syntax, and pragmatics. Courses on “generative grammar” attempt to describe formally the nature of a speaker’s knowledge of his or her native language and to place this knowledge in a psychological and biological framework. Other courses in the program explore the role of the study of language in many scientific, social, and humanistic disciplines, such as cognitive science and artificial intelligence, historical philology and epigraphy, literary theory, neuroscience, philosophy of language and logic, psychology, semiotic and linguistic anthropology, and sociolinguistics.

How to Become a Major or a Minor

In order to get the flavor of the field of linguistics, the best way to start is to take LING 100a (Introduction to Linguistics), which deals with the major concepts of the field and the technical tools used to articulate these concepts. The course also introduces students to the feel of doing research on language, through the use of numerous problem sets concerning the organization of a variety of languages.

Students wishing to major or minor in language and linguistics should arrange to meet with the undergraduate advising head to discuss the planning of a program that meets their interests.
