

Brandeis University

October 20, 2015

Planned Agenda:

- Discussion of the recent release of the first results of the Campus Climate Survey on Sexual Misconduct

Discussion centered on the Task Force's charge post release of the first results of the climate survey data which included: determining how to assess effectiveness of programming in 6 months' time without re-surveying students; improving efforts among graduate students including finding appropriate programming and training; improving awareness of resources so that all students know where to turn for help; specifically, improving awareness of resources very quickly and addressing immediately by social media, flyers in the bathrooms, etc.

Future topics for discussion were identified and included: more data analysis of climate survey results; issues regarding cultural competency, diversity and inclusion in all trainings; policies and support around study abroad; and creating more opportunities for community engagement in the conversation such as future town halls.
