Those who nominated her this year say:

Passionate, informative, engaging, and caring are the first four words that come to my mind when I think of Professor Novack. Dr. Novack presents her lectures in an organized and clear fashion. She wants her students to keep improving.

Dr. Novack provided so many resources to help students thoroughly understand the difficult concepts in this class that she truly leveled the playing field and gave all students an equal chance to do well in the class.

Dr. Novack is one of the most motivating professors I have ever had. She truly cares about the student's well-being and understanding of the concepts. She knows that the course material is not easy, and she give us many opportunities to work through our challenges.
