Comments from students who nominated him include:

“Jané Kondev's mentoring accomplishments are outstanding. He inspires (students) and leads them to accomplish amazing results. His style is supportive and positive, with a combination of enthusiasm, insight and a depth of knowledge in his field that is remarkable.”

“He makes even rather esoteric material not only accessible but exciting for a wide range of students at all levels and from all backgrounds. His students have won prizes for their research, and gone on to top graduate programs.”

“His lectures were so well organized and so clearly presented that one could practically see the ideas taking shape in the air, and one could then catch and assimilate them easily, or even twist some of them and throw them back to the professor. He would catch the bouncing ideas with no problem (he’s one of the most responsive professors to students’ opinions), and juggle with them for our amusement…”
