

Biographical Sketch: Michael F. Hagan

<http://www.brandeis.edu/departments/physics/hagan/>
hagan@brandeis.edu

(i) Professional Preparation

University of Connecticut, Storrs	Chemical Engineering	B.S.E. (summa cum laude), 1998.
University of California, Berkeley	Chemical Engineering	Ph. D., 2003 Advisor: Arup K. Chakraborty
University of California, Berkeley	Chemistry	Postdoctoral, 2003-2006 Advisor: David Chandler

(ii) Appointments

Chair, Biological Physics Program	Brandeis University	7/2013 - present
Associate Professor	Brandeis University	1/2013 - present
Assistant Professor	Brandeis University	1/2007-12/2012
NIH Ruth L. Kirchstein Postdoctoral Fellow	University of California, Berkeley	2004-2006
Postdoctoral Researcher	University of California, Berkeley	2003

(iii) Teaching

- Numerical Modeling Methods in Biology (QB110A): Spring 2013, Spring 2009, Spring 2008, Spring 2007

This is a new course that I designed for undergraduate and graduate students from physics, chemistry, biochemistry, and biology. Applies modern computational techniques to interesting and important problems in biology.

- Graduate Statistical Physics (Phys 163A): Fall 2009
- Biological Physics (QB105A): Fall 2010, Fall 2011, Fall 2013
- Statistical Physics (Phys40): Spring 2011
- Introductory Physics I (Phys11A): Fall 2012

(iv) Research Support

• National Institutes of Health NIAID (Award No. R01GM108021) Computational modeling of viral assembly: Encapsulation of nucleic acids and envelopment by lipid membranes Total Costs: \$1,300,000 (1 PI, role=PI)	<i>September 2013 – April 2018</i>
• National Institutes of Health NIGMS (Award No. R01GM100966) Collaborative experimental and computational studies of conformational transitions in signaling proteins and enzymes Total Costs: \$1,605,150 (2 PI's, role=PI)	<i>August 2013 – July 2017</i>
• Keck Foundation Evolutionary Molecular Self-Organization under Extreme Conditions Total Costs: \$1,000,000 (4 PI's, role=CoPI)	<i>January 2014 – December 2016</i>
• National Science Foundation (CMMI) Collaborative Research: Mechanics and Structural Polymorphism of Bacterial Flagellar Assemblies Total Costs: \$600,000 (3 PI's, role=CoPI)	<i>July 2011 – June 2014</i>
• National Science Foundation (MCB) Building cellular complexity: from molecular motors to synthetic cilia Total Costs: \$185,472 (3 PI's, role=CoPI)	<i>December 2013 – December 2015</i>

- “*Viral capsid assembly kinetics-the roles of the encapsulated polymer and water*”, January, 2011
Berkeley Mini Statistical Mechanics Meeting, Berkeley, CA

(viii) Honors and Awards

- Alberta Gotthardt Strange '56 and Henry Strange Award for Aspiring Young Science Faculty (2012)
- National Institutes of Health Ruth L. Kirchstein National Research Service Award, Individual Postdoctoral Fellowship, 2005
- National Science Foundation Graduate Research Fellow, 1999

(ix) Outreach Activities

- Co-organizer with S. Whitelam (LBL) and R. Jack (U. of Bath) for CECAM workshop entitled “*Self-assembly: from fundamental principles to design rules for experiment*” March 2013
- Co-organizer for the annual Greater Boston Area Statistical Mechanics Meeting (<http://physics.clarku.edu/gbasm/>)
- Co-organizer with S. Whitelam (LBL) for a focus session at the 2012 APS annual meeting, entitled “Self-assembly of proteins: from capsids to crystals”
- Member of the Lawrence Berkeley National Lab Molecular Foundry Theory Facility Proposal Study Panel
- Session chair at the ACS 2010 National meeting, Boston; APS 2011 March Meeting, Boston; 2011 Berkeley Mini Stat Mech Meeting
- Co-developing an experiential learning exhibit at the Discovery Museums in Acton, MA.
- Reviewer for journals relevant to the field including: *Nature*, *PNAS*, *JACS*, *Biophysical Journal*, *Nature Physics*, *Nature Materials*, *Nature Comm.*, *ACS Nano*, *Nano Letters*, *Physical Review Letters*, *Physical Review E*, *Journal of Chemical Physics*, *Journal of the Royal Society Interface*, *Physical Biology*, *Chemical Physics*, *J. Mol. Biol.*.

- Reviewer for funding proposals from agencies including: *NIH, NSF, the Israel Science Foundation, Swiss National Science Foundation, the Medical Research Council (UK), and the Netherlands Foundation for Fundamental Research on Matter*
- Co-wrote transition path sampling module for CHARMM, a publicly distributed program for high-resolution simulations of biological macromolecules. This module makes a new simulation technique for studying rare events accessible to the broader computational biology community.

(x) Affiliations

a) Graduate and Postdoctoral Advisors

Graduate - Arup K. Chakraborty (Massachusetts Institute of Technology)
Postdoctoral - David Chandler (University of California, Berkeley)

b) Thesis Advisor and Postgraduate-Scholar Sponsor

Total Numbers Advised: 9 graduate students (3 graduated), 7 postdoctoral fellows

Postdoctoral Fellows (past 5 years, with current location):

Luca Giomi (Harvard University), Sumedha Sumedha (Assistant Professor at NISER, Bhubaneswar, India), Raghunath Chelakkot (Harvard University), Arvind Gopinath (Brandeis University), Jason Perlmutter (Brandeis University), Yaouen Fily (Brandeis University), Dina Mirijanian (Brandeis)

Graduate Students (past 5 years, with current location):

Oren Elrad (Apple), Yasheng Yang (WorldQuant, Greenwich, CT), Aleksandr Kivenson (Gamma Medica, Salem, NH), Naiyin Yu (Brandeis), Matthew Perkett (Brandeis), Gabriel Redner (Brandeis), Cong Qiao (Brandeis University), William Hicks (Brandeis), Raunak Sakhardande (Brandeis)
