**Subject:** RE: possible misconduct/fraud

These are very serious allegations. It provides a greater level of detail on the shortcomings of an individual case, something that the PEAR report lacked. I believe that we need to inform government, through a dipnote, of the following.

- 1) After returning to the U.S. in March 2010, the adoptive parents have sufficient reason to believe that their daughter was unwillingly taken from her mother, who is alive, and their son is not an orphan at all.
- 2) Both children have alleged that they were abused while under the care of Holt International's orphanage in Durame.
