

The Ros-Kos connector room utilizes a wall-mounted, 50” flat screen display. A wall-mounted control panel is located adjacent to the screen.

Displaying a Laptop

1. To operate the display device, use the **white system control panel**, surface-mounted on the front wall, near the flat screen display panel. **BEST PRACTICE TIP: Due to the nature of this particular screen, we recommend that you connect your laptop first, whether using the table or wall ports, before turning on the monitor.**
2. Once connected, press the **ON** button at the wall control panel to turn on the screen.
3. Select either the **TABLE LAPTOP** or the **WALL LAPTOP** button to activate the laptop connection, depending on where you have connected. The button will illuminate when selected. **On both the table and wall connectors, a small LED will turn green when your laptop signal is detected.** One (1) high bandwidth laptop cable has been attached at the table location. Contact Media Technology Services (MTS) @**ext.6-4632** if interested in borrowing or purchasing additional cables.
4. **DISPLAY RESOLUTIONS:** the 50” screen can display most resolutions, from **800x600 through 1920x1080**. **DISPLAY PORT & MAC users must provide their own adapter.** *See page 2 for laptop display tips.*
5. **PC LOGON:** Use your UNET name and password, in the **USERS** domain. ****Going wireless? If not in the UNET domain, you may logon as a *guest* with your email address, when prompted after opening a browser. ****
6. **AUDIO** can be played from your laptop using its headphone jack, by connecting the audio connector attached to the laptop cable. Volume levels from any source may be controlled using the **VOLUME** knob on the control panel.

Displaying a video device

1. External video or audio sources may be displayed using inputs at both the table and wall connection locations. If desired, items may be ordered from Media Technology Services (MTS), **ext.6-4635**. If you just need video/audio cables, please call MTS (**ext.6-4635 or 6-4632**) to arrange pick up.
 2. Once you have connected your video player, select either the **TABLE VIDEO** or **WALL VIDEO** button, depending upon where you chose to connect your device.
 3. **AUDIO** can be heard from your device if you have properly connected the audio cables. Volume levels from any source may be controlled using the **VOLUME** knob on the control panel.
- ***Lighting controls are wall mounted near your entrance door. MTS does not maintain the lighting, but you can contact Brandeis Facilities at ext. 6-4385.**

****When Finished****

1. Press the **OFF** button at the wall control panel. **Be sure the 50” screen shuts off to save energy and its operating lifetime!**
2. Neatly coil up any cables to help maintain the conference room.
