\* Students electing to receive AP credit for first-year chemistry cannot take CHEM 11a/b, CHEM 15a/b, CHEM 18a/b, or CHEM 19a/b for credit.

\*\*Students may receive credit for either Mathematics AB or Mathematics BC, but not for both.

\*\*\*Students may not receive credit for both Physics 1 and Physics C: Mechanical, or for both Physics 2 and Physics C: Electrical. Students electing to receive AP credit for Physics 1 or Physics C: Mechanical cannot take PHYS 10a or PHYS 11a. Students electing to receive AP credit for Physics 2 or Physics C: Electrical cannot take PHYS 10b or PHYS 11b. If a student claims AP credit AND elects to take PHYS 15, the AP credit earns course credit, but does not count towards the physics major.

+Students may not enroll in a lower level course at Brandeis University and also claim AP exam credit that has a higher level course equivalent. For example, students cannot enroll in MATH 10a at Brandeis and also receive AP credit for MATH 10b. This policy regarding lower-level sequence courses applies to AP Chemistry, Mathematics and Physics exams. If students enroll in lower-level courses after claiming their AP exam credit, that credit will be subject to revocation.
